EDUCATION

President University

Sep 2023 - Dec 2026 (Expected)

Bachelor of Computer Science, Faculty of Artificial Intelligence and Smart Manufacturing

- Current GPA : 3.92/4.00
- Relevant Coursework : Database System, Web Programming, Object Oriented and Visual Programming, Data Structure and Algorithm, Mobile Programming, Digital Forensics, Artificial Intelligence.

EXPERIENCE

PT Panin Dai-ichi Life - West Jakarta, Indonesia

May 2026 - July 2026

IT Application Support Intern

- Supported production applications using Citrix Workspace, maintaining a 95% on-time support resolution.
- Maintained data updates and monitoring schedules using SQL Server Management Studio and PostgreSQL.
- Tracked and managed system issues in GitLab, improving issue visibility and coordination by 20%.

PT Panin Dai-ichi Life - West Jakarta, Indonesia

Feb 2026 - May 2026

IT Service Desk Intern

- Configured laptops, iPads, user accounts, and Google Workspace, achieving 70% device and account readiness.
- Supported troubleshooting, device migration, and account management, reducing time by 20%.
- Assisted IT administration and procurement tasks, improving data organization efficiency by 15%.

PT Telekomunikasi Indonesia (Persero) Tbk - South Jakarta, Indonesia

Aug 2025 - Jan 2026

Developer Intern

- Developed a React.js and Flask application for automated premium number classification, improving processing efficiency by 70%.
- Added secure Flask API with rate limiting for real-time price estimation.
- Enhanced pricing workflow automation for Telkom Account Managers, reducing manual effort by 50%.

PROJECTS

E-Commerce Order & Receipt Management Platform

Jan 2026 - Present

- Building a full-stack two roles platform using React.js and Django REST Framework, backed by PostgreSQL
- Implementing e-receipt generation with QR-code signature verification to prevent receipt tampering/fraud.
- Designing role-based authentication (admin/customer) with account lockout protection for failed login attempts.

Smart Categorization Number Website

Sep 2025 - Oct 2025

- Built a React.js and Flask app to classify numbers based on patterns using regex-based pattern logic.
- Developed the front-end in React.js with a Flask back-end connected via REST API.
- Streamlined the premium-number pricing process for Telkom Account Managers.
