EDUCATION

President University

Sep 2023 - Dec 2026 (Expected)

Bachelor of Information Technology, Faculty of Artificial Intelligence and Smart Manufacturing

- Current GPA : 3.92/4.00
- Relevant Coursework : Database System, Formal Language and Automata, Web Programming, Object Oriented and Visual Programming, Data Structure and Algorithm, Wireless and Mobile Programming, Digital Forensics, Security Risk Management, Artificial Intelligence.

EXPERIENCES

IT Application Support Internship - PT Panin Dai-ichi Life

May 2026 - Present

- Support production applications using Citrix Workspace, maintaining a 95% on-time support resolution.
- Maintain data updates, system configurations and monitoring schedules using SQL Server Management Studio and PostgreSQL.
- Track and manage system issues in GitLab, improving issue visibility and coordination by 20%.

IT Service Desk Internship - PT Panin Dai-ichi Life

Feb - May 2026

- Configured laptops, iPads, user accounts, and Google Workspace, achieving 70% device and account readiness.
- Supported troubleshooting, device migration, and account management, reducing time by 20%.
- Assisted IT administration and procurement tasks, improving data organization efficiency by 15%.

Developer Internship - PT Telekomunikasi Indonesia (Persero) Tbk

Aug 2025 - Jan 2026

- Developed a React.js and Flask application for automated premium number classification, improving processing efficiency by 70%.
- Added secure Flask API with rate limiting for real-time price estimation.
- Enhanced pricing workflow automation for Telkom Account Managers, reducing manual effort by 50%.

PROJECTS

E-Commerce Order & Receipt Management Platform

Jan 2026 - Present

- Build a full-stack admin & customer platform using React.js and Django REST Framework, backed by PostgreSQL
- Implement e-receipt generation with QR-code signature verification to prevent receipt tampering/fraud.
- Design role-based authentication (admin/customer) with account lockout protection for failed login attempts.

Smart Categorization Number Website

Sep - Oct 2025

- Built a React.js and Flask app to classify numbers based on patterns using regex-based pattern logic.
- Developed the front-end in React.js with a Flask back-end connected via REST API.
- Streamlined the premium-number pricing process for Telkom Account Managers.
